

bud

A small growth on a plant that develops into a leaf, flower or new shoot.

.....

bulb

A round, underground food store from which a plant can grow.

.....

exotic

Coming from far away and often very unusual.

.....

flower

The part of a plant that develops from a bud. It is often brightly coloured, produces a pleasant scent to attract insects and creates seeds.

.....

foliage

The leaves of a plant or tree.

.....

fruit

The part of a plant that can develop from a flower. It contains seeds from which new plants can grow.

.....

garden

A piece of land, usually belonging to a building, used for growing fruit, flowers, herbs or vegetables, and for enjoyment.

.....

germinate

When a plant begins to grow out of a seed.

.....

herb

A plant with leaves, flowers or seeds that can be used for cooking or making medicine and perfumes.

.....

leaf

The part of a plant that grows out of the stem and uses sunlight to make food.

petal

The part of a plant that is often colourful and makes up most of the flower with other petals.

.....

poisonous

Can cause illness or death to living things if touched or eaten.

.....

rainforest

A tall, dense forest in a tropical area that has lots of rain.

.....

root

The part of a plant that grows out of the seed and deep into the ground to find water and minerals.

.....

scent

A particular smell, especially if it is pleasant.

.....

seed

A small, hard grain from which a new plant can grow.

.....

shoot

The part of a plant that grows upwards out of a seed, before it develops into the stem and leaves.

.....

stem

The part of a plant that grows upwards, towards the light. It supports the plant.

.....

weed

An unwanted wild plant that often grows alongside more desirable plants, stealing their light and nutrients.
