

How to make a seagull finger puppet

You will need:

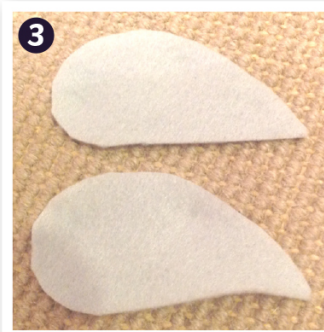

- white, grey, yellow and black felt
- two small black buttons
- needle, thread and glue
- scissors

Cut around the template for the body and head (white felt), wings (grey felt), wing tips (black felt) and beak (yellow felt).

Glue or stitch together the white felt pieces to make the body and head. Leave a hole for your finger to go inside the puppet.

Stick the grey felt wings to the sides of the body.

Put glue on the tips of the grey wings to hold them together.

Glue a black wing tip onto the end of each grey wing.

Stick the two yellow felt shapes and the black buttons onto either side of the head to make the beak and eyes.
